Total Solutions in
Water Management Systems

- House Building
- Commercial, Public & Industrial Buildings
- Civil Engineering & Utilities
- Sports & Recreation Parks
- Agriculture, Horticulture & Aquaculture

Welcome to the world of JDP

Over the last 40 years JDP has grown to become one of the largest suppliers of house building, construction, drainage and civil engineering products in the UK. JDP is part of Tessenderlo Group, a worldwide organisation in more than 20 countries.

JDP is MORE than just a Merchant

Together our manufacturing capabilities, technical knowledge and extensive product ranges makes us one of Europe's leading experts throughout our industries. Through our growing network of 26 branches across the UK, JDP is always close to the project and ready to serve.

To deliver first class customer service we combine expert knowledgeable staff, dedicated delivery and high quality products. Our specialist Technical Support Department can provide in-depth design and technical help for projects; whether the project is a new scheme or an existing one we aim to minimise the costs and provide the most effective solution every time.

JDP continues to invest in extensive stock levels to ensure local availability of civil and drainage products to support local trades across the UK. Commitment to maintain stock levels has played a key part in the strength of JDP and its resilience to remain a leading supplier within the industry. With over 15,000 products JDP is truly a one-stop shop for its customers and is committed to providing total solutions in water management.

Manufacturing and Partners

JDP is part of the Tessenderlo Group, a worldwide specialty company focused on food, agriculture, water management and on valorizing bio-residuals. The group employs over 7000 people and is a leader in most of its markets with a consolidated revenue of €2.130 billion in 2012.

Plastic Pipe Systems

As part of Tessenderlo Group's Plastic Pipe Systems (PPS) business unit JDP and our partners DYKA, Sotra-Seperef, BT Fitting Group and Nyloplast BV rank among Europe's leading experts in piping systems and solutions. The PPS business unit develops, produces and distributes plastic pipe systems for water management and infrastructure across Europe.

Group Partners

From uPVC recycling plants to fertilizers and animal nutrition; products manufactured by other areas of Tessenderlo Group are scarcely noticeable and yet ever present in every day life. You can find Tessenderlo Group products in bio-fuels, pet food, crop fertilizers, car dashboards, pharmaceuticals, window and door profiles, rubber grips on pens and much more.

Manufacturing Capabilities

Close partnerships with the world's leading manufacturers ensure that JDP can offer its customers products, which are at the leading edge of design and technical innovation. Alongside our partners in Tessenderlo Group, JDP has the capability for 'in-house' manufacturing delivering high quality products with lower costs.

Our on-going research and dedication to sustainability is discovering new products that are lightweight, easier to install and require less machinery on-site so that you, the customer, benefit most from our range.

Manufacturing Partners

JDP's reputation is built on over 40 years experience in water management. During this time, our work with our manufacturing partners has provided our customers with a total solution for their projects, combined with a national network of branches to ensure local availability.

The DYKA Factory (Belgium)

Customer support

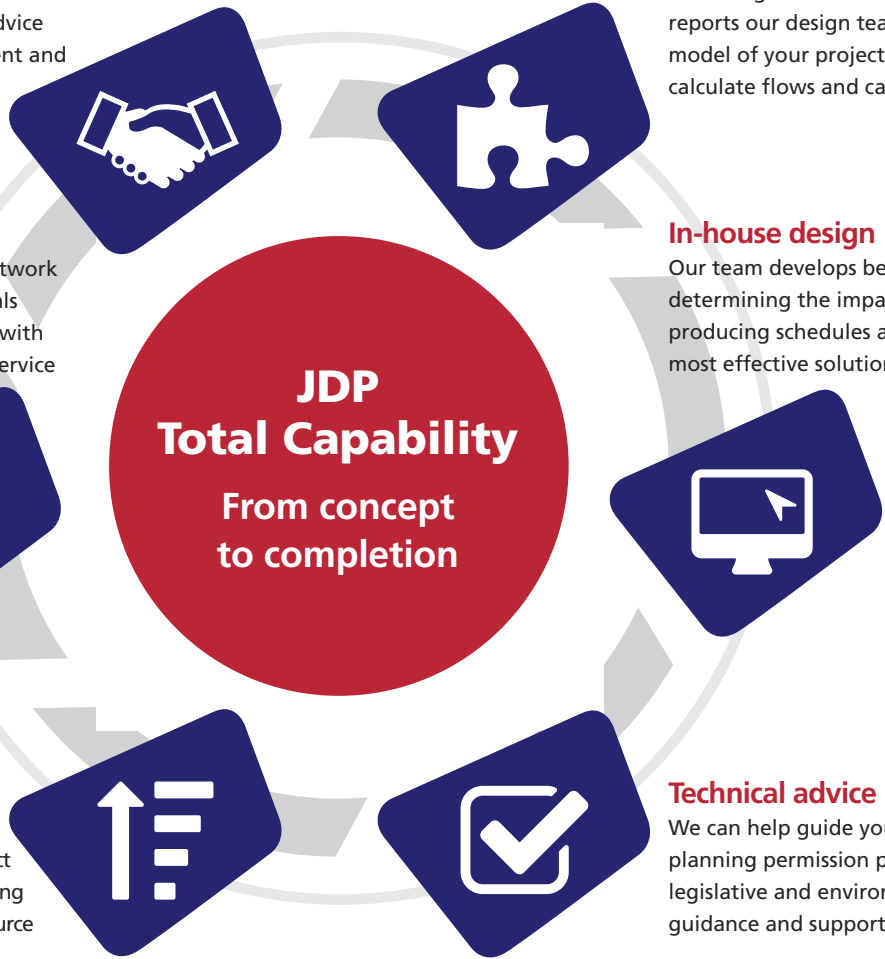

Our staff offer expert after-sales product and application advice with a fast, friendly, efficient and customer-focused service

Reliable delivery

Our nationwide branch network can supply all your materials direct to site and on time, with our fast, reliable delivery service

15,000+ products

Extensive quality product availability to achieve project deadlines. Providing everything for your project from one source

Specialist expertise

Following site visits and topography reports our design team creates a model of your project to accurately calculate flows and capacities

In-house design

Our team develops bespoke systems determining the impacts of flooding and producing schedules and designs for the most effective solution for your project

Technical advice

We can help guide you through the planning permission process, providing legislative and environmental guidance and support

Technical design and customer support

- **Technical advice** and support from concept to completion
- **In-house design** providing the best integrated solution

High quality products

- **Extensive product availability** (15,000+ products) to achieve project deadlines
- **Everything for your project** available from one source

Dedicated, nationwide distribution

- **Fast, dependable delivery** by national distribution network
- **Available close to your project** ensured by our national branch network

Expertise and knowledge

- **Industry expertise** guarantees the right specification
- **Product knowledge** to ensure the best solution

JDP - Serving the markets

With more than 40 years of expertise in drainage and water management, over 15,000 products, providing solutions and first class services for house building, commercial, public and industrial buildings, civil engineering and utilities as well as sports and recreation parks and agricultural, horticulture and aquaculture – JDP is here and ready to serve.

	House Building
	Commercial, Public & Industrial Buildings
	Civil Engineering & Utilities
	Sports & Recreation Parks
	Agriculture, Horticulture & Aquaculture

JDP offer you loads MORE...

Loads MORE for... House Building

Key environmental issues, such as sustainable urban drainage (SUDS), flood prevention and the increasing use of brownfield sites, are causing the house building market within the UK to change. Effects such as these increase the demands placed on suppliers and the products and services they offer.

At JDP we have continued to diversify our product range to respond to these changes and have become recognised as a specialist in the supply of high quality product systems for house building. Our staff will be pleased to offer expert product advice and application guidance whether your project is a self-build, renovation or even part of a large housing development.

Total Service and Solutions

Our attention to detail and genuine care for our customers combined with one of the most comprehensive product portfolios, stocked in depth, makes JDP the first port of call for the house builder.

We also offer technical support & design advice, on site take-offs and formally approved products, which offer solutions for site preparation and construction.

No matter what the requirement, large or small, JDP offer a fast, friendly, efficient, knowledgeable and customer focused service from one source for all the materials for your project.

Providing a comprehensive product range:-

- Road Building Products
- Underground Sewer Systems
- Sewage Treatment Solutions
- Surface Water Drainage
- Surface Water Management
- Rainwater Harvesting & Storage
- Ducting Systems
- Mains Supply & Service Connections
- Geotextile & Membrane Technology
- Hot & Cold Water Systems
- Above Ground Systems
- Storage Tanks
- Landscape Finishing Products
- Building Materials
- Accessories

Loads MORE for... Commercial, Public & Industrial Buildings

For taking rainwater from the roof down to the river JDP has extensive knowledge to assist with the design and specification of complete storm water management solutions. Using products from our key suppliers as well as our manufacturing partners, we offer a diverse range of options to cover virtually any application.

With Vacurain®, a BBA-approved syphonic roof drainage system with unique properties and produced by our manufacturing partner DYKA, we provide systems that bring the rainfall to ground level efficiently. JDP offers further experience of infiltration and attenuation to achieve strict SUDS output for the development all the way to the river.

Total Service and Solutions

Comprehensive product ranges for all designs of below ground drainage from channel drain to pollution interceptors are available from JDP.

With our technical knowledge and in-house design and our capability at our factories, architects and developers can safely hand the total drainage package over to JDP for a quick, cost effective solution. In short, JDP is the one-stop shop solutions provider for the drainage and water management requirements for commercial, public and industrial buildings.

Providing a comprehensive product range:-

- Above Ground Systems
- Rainwater Harvesting & Storage
- Surface Water Management
- Surface Water Drainage
- Sewage Treatment Solutions
- Underground Sewer Systems
- Road Building Products
- PVC & ABS Pressure Systems
- Mains Supply & Service Connections
- Hot & Cold Water Systems
- Ducting Systems
- Geotextile & Membrane Technology
- Retaining Walls & Embankments
- Landscape Finishing Products
- Building Materials
- Storage Tanks
- Accessories

your comprehensive guide to product solutions, applications, standards and installation guides

Loads MORE for... Civil Engineering & Utilities

JDP's experience of supplying the civil engineering and utilities markets has been built around its reputation as a specialist. Offering first class product and application expertise together with high quality products and technical support, ensuring total peace of mind.

We have continued to develop and expand our product portfolio, offering specialised ranges through our nationwide network of branches. Combined with our dedicated vehicle fleet, ensuring timely availability of the total solution for our civil engineering and utilities customers.

Total Service and Solutions

Extensive distribution coverage throughout the UK, together with comprehensive product ranges, give JDP an excellent position to support the construction and maintenance of infrastructure networks including roads, water distribution and communication services from individual projects to multi-site operations nationwide.

JDP is consistently recognised as a leading supplier in the civils and utility market because of our expertise and high quality products.

Providing a comprehensive product range:-

- Polyethylene Pressure Systems
- uPVC Pressure Systems
- Valves & Hydrants
- Road Building Products
- Retaining Walls & Embankments
- Surface Water Management
- Surface Water Drainage
- Underground Sewer Systems
- Ducting Systems
- Building Materials
- Storage Tanks

Loads MORE for... Sports & Recreation Parks

From the Belfry, Loch Lomond and Celtic Manor to St. Andrews; the UK's greatest golf courses are drained by JDP product. JDP's network of branches offers product systems for new developments and complete renovation, as well as product solutions for general remedial works.

Our sports and recreation products are in use at horse racing courses, cricket pitches, bowling greens, polo pitches and football stadiums throughout the country.

Total Service and Solutions

Even if the project is not sports related our products are perfectly suited for parks and grounds and contain a broad range of sewer, building and service supply products as well as drainage and irrigation.

Providing a comprehensive product range:-

- Road Building Products
- Underground Sewer Systems
- Mains Supply & Service Connections
- Irrigation Systems
- Borehole Systems
- Ducting Systems
- Above Ground Systems
- Surface Water Management
- Storage Tanks
- Geotextile & Membrane Technology
- Landscape Finishing Products
- Building Materials
- Accessories

Loads MORE for...

Agriculture, Horticulture & Aquaculture

Over time, environmental legislation and other demands placed upon farming communities have led to change and diversification.

Whether it is arable, livestock, horticulture or aquaculture farming is a challenging business.

At JDP we have continued to diversify our product range to respond to these changes and continue to grow our market share in these sectors as JDP becomes recognised as a specialist in the supply of high quality product systems that offer cost effective solutions to this market. Our staff will be pleased to offer expert product advice and application guidance whether the requirement is draining fields, fixing a water supply, installing irrigation systems, renovating buildings or developing a whole site.

Total Service and Solutions

We offer technical support and advice, as well as on-site take offs, combined with formally approved products, which offer solutions for site preparation, land management and livestock.

No matter what the requirement, large or small, JDP is the first port of call for the farmer; offering fast, friendly, efficient and knowledgeable customer focused service.

Providing a comprehensive product range:-

- Livestock Products
- Mains Supply & Service Connections
- Borehole Systems
- Irrigation Systems
- Surface Water Drainage
- Above Ground Systems
- Storage Tanks
- Hose & Fittings
- Accessories

Excellence through Quality

Quality Assured

JDP is committed to providing its customers with quality products and solutions. All products within our comprehensive product portfolio are carefully chosen to ensure the highest quality assurance and standards. JDP is ISO 9001 quality assured.

World Leading Manufacturers

Close partnerships with the world's leading manufacturers ensure that JDP can offer its customers products, which are at the leading edge of design and technical innovation.

We also work with ISO 14001 accredited suppliers to ensure manufacture, delivery and installation of products are as sustainable as possible.

Research and Development

On-going research and development through our own dedicated manufacturing facilities and close partnerships with other manufacturers ensure that JDP offers the best quality possible with the industry's modern products and services. JDP is often the first to embrace new products and offer them from stock, from syphonic roof drainage to plastic manhole chambers.

Performance Through Quality

'Performance through Quality' is a theme for personal development throughout JDP. Commencing with induction for new employees and continuing with regular updates in performance, staff are kept aware of the importance of compliance as a means of delivery for customer satisfaction. It is the target of JDP to be sufficiently proactive in this area that the business is focused more on preventative rather than corrective measures and that the attention to detail yields a customer service which is good enough to be a competitive advantage to JDP.

JDP and Sustainability

Sustainability

JDP has a clear definition of sustainability: *progress that meets societal needs whilst respecting ecological and social limits. We created three priorities - people, profit and the planet - so that you, the customer, can benefit and have a more sustainable business with our products and services.*

People

Staff at JDP come from all walks of life and receive ongoing training and development. From basic induction to comprehensive product and skills training through to our PRIDE programme. We engage in the local communities through educational initiatives across our branch network raising the awareness of the importance of preserving our environment and our planet's most precious resources.

Profit

We believe that if JDP is to remain a profitable organisation it will be through offering products and services to customers that give them opportunities to develop their own sustainable models and invest in the future.

Planet

JDP is investing in transport management to reduce our CO₂ footprint, building sustainable KPIs in our reporting systems and working to ISO 14001 standards. We also work with ISO 14001 accredited suppliers to ensure manufacture, delivery and installation of a product is as sustainable as possible.
