

# ULTRA3<sup>®</sup>

## UNDERGROUND DRAINAGE

Nature's Network

## ULTRA3® The Complete Sewer & Drainage Solution

ULTRA3® from JDP is a market-leading dual-purpose drain and sewer pipe system. ULTRA3 is the ideal choice for all situations, from on-plot 110mm to main sewers up to 630mm, giving you a single range solution. Popular with installers, ULTRA3 is a complete system with a common installation process across the entire range.

## Fast To Install & Long Service Life

With its simple installation system, ULTRA3 is easy to use and fast to install, reducing time on site. Made from at least 40% recycled PVC, ULTRA3 is an environmentally responsible choice with SN8 stiffness and a lifespan to match traditional materials, making ULTRA3 the future of drainage systems.

Our ULTRA3 range is kitemarked to BS EN 13476-2, making it fully adoptable across the UK.

## Compliant & Adoptable Nationwide

ULTRA3 is a complete system that is adoptable by all water authorities across the whole of mainland UK. Fully compliant under SfS (Scotland), SfA (Wales) and DCG (England), ULTRA3 is available, from stock, in JDP branches across the country or by direct delivery to site.

## Safer On Site & Sustainable Choice

ULTRA3 is the health and safety person's system of choice. Manufactured from virgin PVC-U on the outer and inner surfaces (for optimal flow performance), the inner core is engineered from carefully selected recycled PVC. This makes for a uniquely 'green' product that is relatively light compared to traditional materials and therefore safer to handle on-site, requiring less hazardous and expensive mechanical handling.

Illustrative description of ULTRA3 PVC-U inner and outer surfaces with a recycled PVC Core.

## The Installer's Choice from Plot to Mains

ULTRA3 is popular with installers nationwide because it is a one-stop solution from plot to mains. Available in a full range of diameters from 110-630mm, ULTRA3 has high-quality integral seals that reduce the time it takes to install, improving the efficiency and effectiveness of your sites.

## Designed For You, Engineered To Last

Reduced weight and faster installation does not mean reduced quality! Manufactured by DYKA, JDP's sister company, ULTRA3 is the product of years of design, testing and feedback from installers, customers, and industry experts, ensuring the right drainage solution for your sites every time.

For more information, visit our website: [www.jdpipes.co.uk](http://www.jdpipes.co.uk)

# The Range You Can Trust

ULTRA3 is manufactured to the highest standards in our own state-of-the-art factories. This ensures that, as a merchant-manufacturer, we have the perfect product for you.

## When You Specify a Piping System, You Can Be Sure That ULTRA3 is certified to:

- **BS EN 13476 [-1, -2]** – Plastic piping for non-pressured systems. In addition to compliance, ULTRA3 is at least 40% recycled!
- **BS EN 1401-1** – Solid wall PVC-U piping requirements for non-pressurised underground sewers and drains. Only fittings are compliant.
- **WIS 4-35-01** – ULTRA3 meets and exceeds the standards for pressure jetting and with a low coefficient of friction to minimise the risk of blockage, it is a long-life, low maintenance system.

## Adoptable Nationwide

ULTRA3 is tested, certified and approved for adoption by all mainland UK Water Authorities. As a complete system, from on-plot to main sewers, available nationwide, ULTRA3 gives you a single solution that is fast and simple to install for all your drainage needs.

# Merchant Range, Manufacturer Expertise

JDP is both your local merchant and the manufacturer of ULTRA3. This gives you access to a unique level of expertise and advice to make your projects run even more smoothly.

## Support On Call

- Advice on call – JDP's Technical Department is on call or just an email away for questions and support with first-class, customer-focused advice.
- Technical expertise – Whether you need a simple take-off pricing or a complete system design, we have the knowledge and experience to help.
- Value engineering – One of the many reasons JDP customers relish working with us is that our Technical Department can add value to their plans by reducing cost, increasing efficiency or both.

**Technical Support: 01228 794445**

JDP is an expert source of advice for water management design. From a simple question to a cutting-edge underground sewer design, the benefits of using JDP's Technical Support Department include:

**Take-off - Bill of quantities and quotes from existing drawings**

**Advice – From best practice to regulatory guidance**

**Value engineering – Cost effective solutions to improve efficiency**

**Liaison – Intermediary with consultants, engineers and architects**

**Design – From scratch design for stormwater attenuation**

[www.jdpipes.co.uk](http://www.jdpipes.co.uk)

## Here When You Need Us

Delivering on your promises – JDP has branches with stock in depth, nationwide so you have the support you need on hand. In addition, we deliver to sites every day with 98% on time and in full.

## Sustainable Drainage Systems

We offer free, accredited CPD sessions to share our expertise.  
**Book or enquire online**

## Next Generation Technology

ULTRA3 is much more than just a drain/sewer system - it is the sustainable choice for the next generation of projects. PVC-U is an engineered technology designed to last as long as any traditional material but with even better flow characteristics. Manufactured with a recycled PVC core, it also reduces waste.

## Sustainable, Durable & Recycled

ULTRA3 is tough and highly durable, meeting, and exceeding WIS jetting standards with SN8 stiffness, ensuring that, although it is easier to lift, it is never lightweight in performance. Add to this the at least 40% recycled PVC used in its manufacture and you have a high performance solution with a positive environmental impact.

## Fast, Direct Connection to Chambers

ULTRA3 is also optimised with PPICs, especially DYKA's AXEDO range. ULTRA3 is designed to connect directly with AXEDO, further reducing the installation time and the number of components required. Add to that the integral seals in ULTRA3, and you have a system that can be installed, tested and ready to be commissioned while others are still unloading!

# Reduce Installation Time By Up To 35%

As a complete system, ULTRA3 and AXEDO are up to 35% faster to install than traditional alternatives. Being available all from a single supplier helps reduce the complexity of your supply chain and inventory.

For more information, visit our website: [www.jdpipes.co.uk](http://www.jdpipes.co.uk)

# Fittings

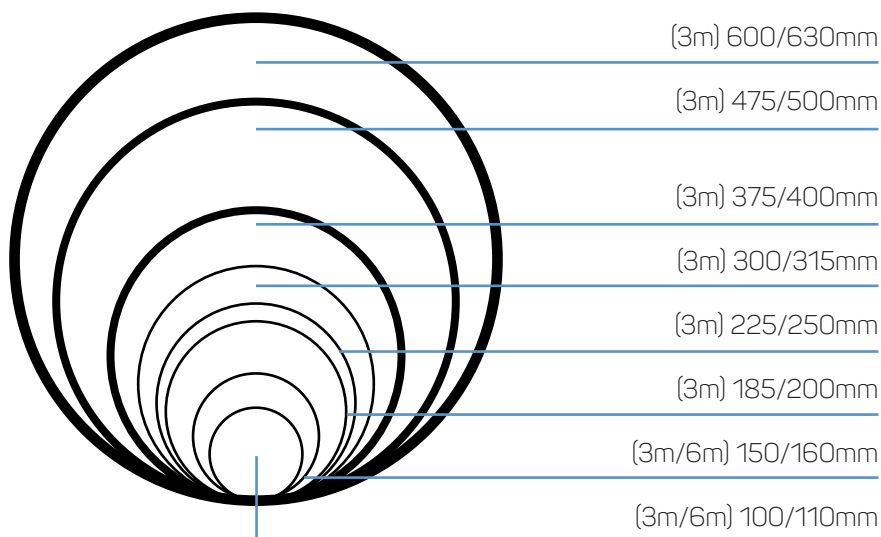

ULTRA3 can be used in both house drainage (100/110mm & 150/160mm) and adoptable sewers (150/160mm - 600/630mm) compliant with water authority requirements. A large range of fittings are available to ensure the project goes as smoothly as possible.

## One Range of Pipes & Fittings

ULTRA3 and AXEDO offer a complete solution for drainage/sewerage pipe and inspection chamber systems. Both are fully adoptable nationwide and available from stock in branches across the mainland UK or for delivery.

ULTRA3 is a complete solution in standard 3m and 6m lengths with a full range from on-plot to mains. Product range, nominal size and outside diameter:

## Minimise Maintenance

After the system is installed, your choice will continue to benefit users for decades. AXEDO provides fast, easy non-entry inspection and maintenance with a smooth flow characteristic, ensuring the absolute minimum of unplanned activity.

Whether you are looking for a solution for RMI, a new build project, a residential complex or an industrial installation, ULTRA3 from JDP is the solution.
