## RAINBOX® CUBE

The RAINBOX ${ }^{\circledR}$ Cube system is designed for use in non-trafficked and trafficked areas (with a Gross Vehicle Weight of 60 tons), and can be installed in soakaway (infiltration) or storage (attenuation) applications for surface and storm water management. The system is comprised of base plates, crates and side faces, in various number and configuration depending on the project, with up to 14 layers being possible per base plate.
