DYKA ULTRA3 Bottle Gully & Back Inlet Gully

The DYKA ULTRA3 Bottle Gully allows for an easy connection between above ground rainwater, waste systems and the below ground drainage network. The gully is supplied as a standard bottle gully or with back inlet option.

Key features & benefits:

- Removable air trap prevents smells whilst still allowing access to the below ground system for maintenance.
- Height adjustable hopper provides flexibility on site for installation.
- Outlets to suit 110mm OD ULTRA3.
- Square top for ease of installation with all surfaces including paving.
- Strong, durable, slip resistant plastic grate
- Supplied as standard with plastic grate but additional metal grate available.
